## Atheists Tell Us Why

Beware of the embedded lies – i.e. Christianity fighting science – not true.

### G. Richard Bozarth

*‘Christianity has fought, still fights, and will continue to fight science to the desperate end over evolution, because evolution destroys utterly and finally the very reason Jesus’ earthly life was supposedly made necessary. Destroy Adam and Eve and the original sin, and in the rubble you will find the sorry remains of the Son of God. If Jesus was not the redeemer who died for our sins, and this is what evolution means, then Christianity is nothing.’*

### Frank Zindler in 1996

*“The most devastating thing though that biology did to Christianity was the discovery of biological evolution. Now that we know that Adam and Eve never were real people the central myth of Christianity is destroyed. If there never was an Adam and Eve there never was an original sin. If there never was an original sin there is no need of salvation. If there is no need of salvation there is no need of a saviour. And I submit that puts Jesus, historical or otherwise, into the ranks of the unemployed. I think that evolution is absolutely the death knell of Christianity.”*

### Richard Dawkins in a Feb. 2011 TV interview at the 4 min. 21 sec. point

*“I think the evangelical Christians have really sort of got it right in a way, in seeing evolution as the enemy. Whereas the more, what shall we say, sophisticated theologians are quite happy to live with evolution, I think they're deluded. I think the evangelicals have got it right, in that there really is a deep incompatibility between evolution and Christianity.”*
